

Technical specifications

# HSI Harness Basic+

A lightweight three-point harness with adjustable chest and thigh straps, enhanced with padded shoulder, back and leg section for comfort during extended use. The harness features a dorsal D-ring attachment on the back and two attachment loops on the chest, providing versatile and secure connection options. This harness offers the convenience of automatic click buckles, eliminating the need for manual buckles.

## Use

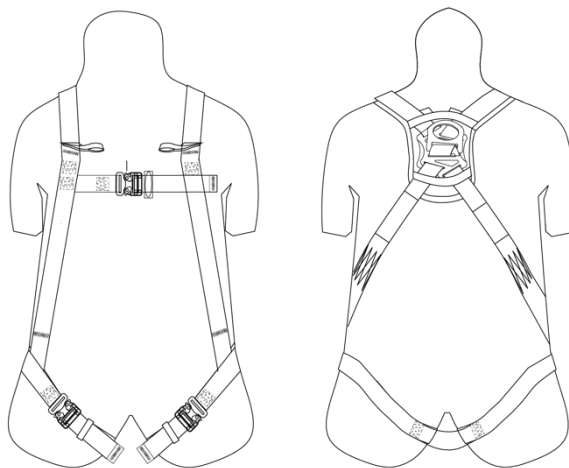

This fall protection harness is designed to distribute impact forces evenly across the body, it provides secure attachment points for fall arrest systems.
