

Technical specifications

Scope Standard Baseplate

The baseplate is designed for installation on the roof of a building. It can be placed on various substrates and roof constructions without the need to cut the roof covering or insulation. The baseplate is fully overlaid with roofing material. Its round shape makes it ideal for positioning at different locations on the roof. Additionally, the baseplate is used for all endpoints and intermediate points of the Scope line system.

Use

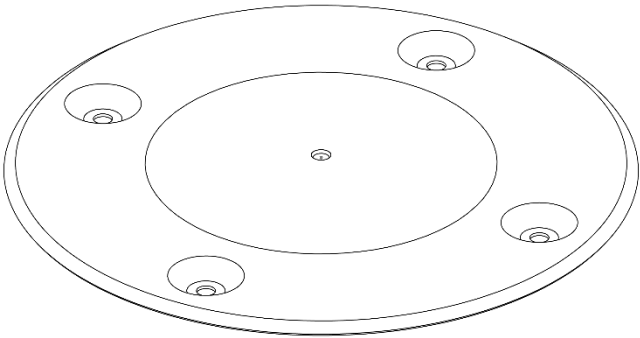

Only suitable for use in combination with Scope line system components. For installation, see the installation manual.

Materials

Baseplate:	Stainless steel 304 – 2 mm
Bottom plate:	Stainless steel 304 – 10 mm
Insulation rings:	Nylon, 4 pieces

Technical details

Weight:	2.6 kg
Plate dimensions:	Height 18 mm Diameter 414 mm
Anchorage:	4x M10 M12
Packaging:	6 per box
Processing:	Pickled and passivated
Ref.:	VB97DI084
