

Technical specifications
Scope DP-R

The Scope DP-R is designed as an intermediate post for the Hütter Scope horizontal line system and can be used in combination with the Scope DP as both end and corner points. This combination complies with NEN-EN 795:2012 Type C (Notified Body: Satra Technologies UK).

The DP-R closely resembles the DP, but features one fewer absorbing element. This is possible because the forces during a fall are directed to the end and corner points through the Scope line system.

Use

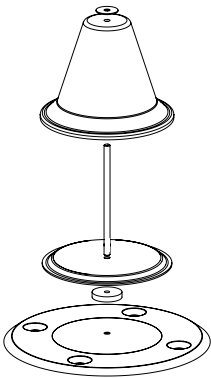

Suitable for use in combination with Scope line system components.

Materials

Post:	Aluminium 3 mm (powder-coated)
Finish:	Powder coat
Baseplate:	See available baseplates
Rod:	Galvanized steel
Safety nut:	Stainless steel 316
Sealing disk:	Nylon

Technical details

Breaking strength:	40 kN
Weight:	2.18 kg
Dimensions:	Diameter 262 mm
Absorption threshold:	6.5 kN
Anchoring:	M10 M12
Marking:	Serial number on safety nut
Packaging:	Individually packaged
Colour:	Red (customer colours available on request)
Tools:	Safety bolt wrench
