

Technical specifications

Scope HD (Overhead) Tensioner

The Scope HD (Overhead) Tensioner is part of the horizontal line system and is designed as a permanent connector between the stainless-steel cable and overhead endpoint. The Tensioner offers the possibility of adjusting the tension on the cable by turning it. The adjustment of the HD (Overhead) Tensioner is secured by means of a cotter pin.

Use

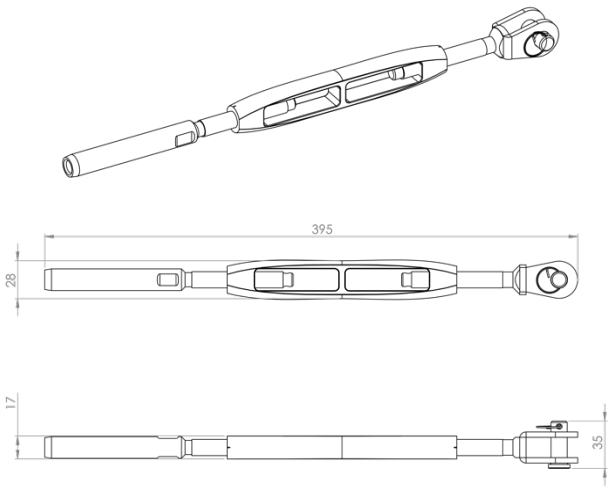

The Scope HD (Overhead) Tensioner attaches the Scope Overhead Endpoint and is in use with the 8mm 1x19 cable. The pressing of the cable should be done according to the specifications in the installation manual.

Materials

Tensioner:	Stainless steel 316
Surface treatment:	Electropolished

Technical details

Breaking force:	50 kN
Weight:	0.605 kg
Attachment:	Fork and Terminal
Packaging:	Individually wrapped in plastic bag
Colour:	Chrome
Ref:	VB04OH073
