

Technical specifications
HSI SRL 15m

Robust light weight ploymer casing. Has a swivel achorage eye at one end, and a swivel steel snap hook with energy absorber at the retractable end.

Use

This retractable block, also known as a self-retracting lifeline (SRL), is designed for fall arrest applications, providing a reliable connection between the user and anchor point. The retractable mechanism allows the lifeline to extend and retract automatically, ensuring freedom of movement while keeping the lifeline taut to reduce trip hazards. In the event of a fall, the internal braking system activates to arrest the fall.

Materials

Cable:	Galvanized steel wire rope
Snap hook:	Alloy steel
Casing:	Plastic

Technical details

Breaking strength:	12 kN
Weight:	7.1 kg
Dimensions:	Width 96 mm Hoogte 282 mm
Relevant standards:	EN 360: 2002
Packaging:	Single unit box
Colour:	Black
Ref.:	VB01VI006
