

Technical specifications
HSI Lanyard
Single Line

Single leg lanyard incorporated with energy absorber. One end of the lanyard equipped with steel snap hook and the other end of the lanyard is equipped with a rebar hook. The lanyard is available at the length of 1.8 metres.

Use

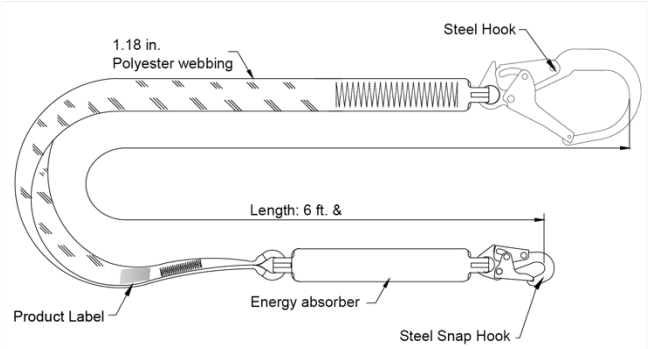

The single-line lanyard is designed for fall arrest applications, providing a secure connection between the user and an anchor point. It features an energy-absorbing mechanism to minimize impact forces during a fall. The sturdy connectors ensure reliable attachment to both the anchor point and the safety harness.
