

Technical specifications

Scope Stainless Steel Cable

The stainless steel cable serves as the foundation of the line system. The cable is connected at the endpoint by applying a crimp to the wire fork of the fork terminal, tensioner, or absorber.

Use

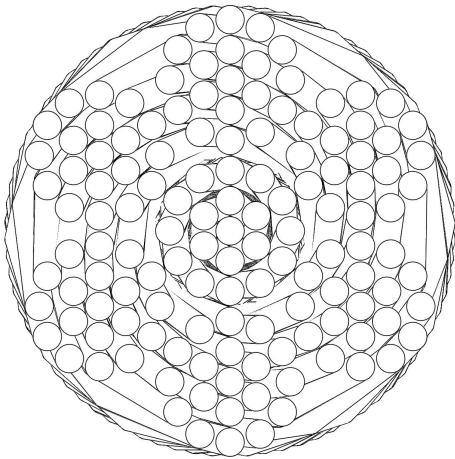

The stainless steel cable 7x19 is used for both the dynamic Scope horizontal and vertical line systems.

Materials

Cable: Stainless steel 316 wire and core

Technical details

Breaking strength:	33 kN
Weight:	0.24 kg/m
Thickness:	8 mm
Configuration:	7 x 19
Testing:	ISO 9001
Ref:	VB04PR015
