

Technical specifications

Scope Vertical Top and Bottom Bracket

The vertical line system provides a vertical solution for ladders. The top and bottom tubes are made of stainless steel, suitable for all types of industrial applications.

The Scope vertical system provides the user with safety and freedom of movement while working. Only one hand is needed to pass the shuttle through an intermediate tube. The product complies with the EN360 standard.

Use

Permanently attached. For 1 user at a time (1 user per vertical shuttle). Only suitable for use with Scope components.

Materials

Upper tube:	Stainless steel 304
Lower tube:	Stainless steel 304

Technical details

Upper tube:	2000 x 40 x 40 mm
