

Technical specifications

# Scope Vertical Shuttle

The Scope vertical shuttle (no absorber needed) is suitable for an 8 mm stainless steel cable. In the event of a fall, the shuttle clamps onto the cable, preventing the user from falling. The shuttle is detachable from the cable; refer to the user manual for instructions. With the carabiner attached to the shuttle, the user ensures that the shuttle cannot detach from the cable.

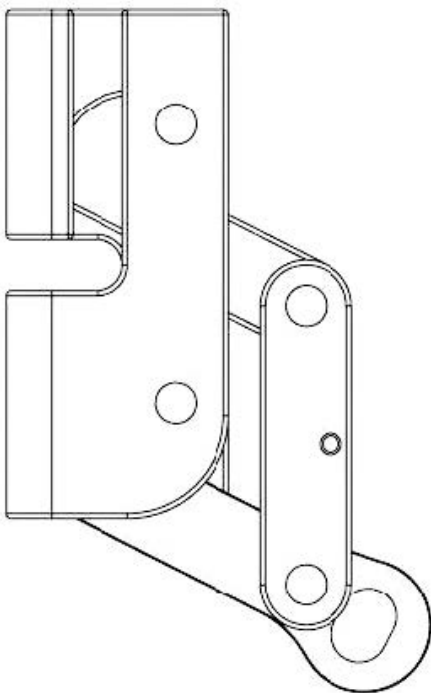

**Use**  
Suitable for use with the Scope cable system and for use by one person. Recommendation: use the shuttle as personal portable equipment.
