

Technical specifications

Scope Mounting Cross

The Scope adjustable stainless steel baseplate for metal profiles and standing seam roofs features two hinged, adjustable components that allow precise spacing. This versatility makes the Scope Mounting Cross Baseplate suitable for a wide range of applications. For installation on metal roofs, pop rivets or clamp systems can be used.

Use

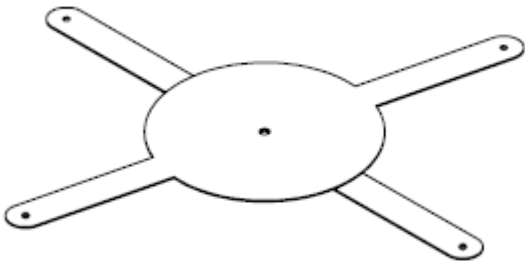

The Scope Mounting Cross is specifically developed for attachment to steel roof panels and standing seam roofs. It is only suitable for use in combination with the Scope Multi Dynamic Anchor Post.

Materials

Baseplate:	Stainless steel 316 – 4 mm
Surface treatment:	Electropolished

Technical details

Weight:	2.9 kg
Dimensions:	Diameter 490 mm
Attachment:	Anchoring
Marking:	Badge nr. on baseplate
Packaging:	Individually packaged,
Colour:	Chrome, special colours available upon request
Ref.:	VB97DI026
